DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-26 and 35, drawn to a method of making a product and a product by process, classified in class 435, subclass various.
 - II. Claims 27-34, drawn to a product, classified in class 435, subclass 2.
 - III. Claims 36 and 37, drawn to a method of using the product, classified in class 424, subclass 520.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by using a different final extender such as water or a salt.
- Inventions, and are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used as a substrate for an enzyme in an assay.

Art Unit: 1651

4. This application contains claims directed to the following patentably distinct species of the claimed invention: the species of claim 12, specifically what cryoprotectant and what additional component.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Emily Haliday on 4/10/2000 to request an oral election to 5.

Page 4

the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

Any inquiries concerning this communication should be directed to Examiner Mike

Meller at telephone number (703) 308-4230. If attempts to reach the examiner by telephone are

unsuccessful, the Examiner's supervisor, Michael Wityshyn, can be reached at (703) 308-4743.

The Fax phone number for the art unit is (703) 308-0294. Any inquiries of a general nature or

relating to the status of this application or proceeding should be directed to the Group

receptionist whose telephone number is (703) 308-0196.
